

Hooray, the carnival is here

Mardi Gras, Pentecost, Easter is coming.... Mardi Gras has been a symbol of gaiety, fun and feasting since time immemorial. One of these carnival days is the annual carnival at our school. The children were looking forward to it for weeks and were constantly thinking about what mask they would please their friends and all of us with.

The carnival took place on February 18, 2022, and the children took great care in choosing their costumes. Kings and princesses, cowboys, batmen, spidermen, mincrafters, or rock stars suddenly appeared in the school, It was a joy to watch. The carnival masks did not lack creativity or originality, a variety of colors and the use of different materials in their production. Many took several days to produce. Therefore, we want to thank the parents and grandparents for their cooperation.

Since this year the traditional carnival was somewhat unconventional due to the "covid era", the children had fun in the classrooms, where the fun competition alternated with dance laps. Unreal joy could be felt in the vestibule of the school, where individual classes gradually arrived to the sound of music and after a short presentation of the masks, the long-awaited evaluation followed. Here, the already difficult task was taken over by the jury, which consisted of educators under the leadership of the deputy Mgr. Ludka Saloková. And it was really not easy to choose the "best" masks, because they were all really charming. The children were rewarded with really interesting prizes that brought smiles and satisfaction to their faces.
